

NMCD Therapeutic Restraints / Seclusion

Programming Items Related to LOS 2574871

- Once a patient's LOS in **Medical - Therapeutic Restraints** reaches ≥ 8 hours, the row should change to PURPLE, indicating that a new Provider order is needed (i.e. Provider needs to complete a Therapeutic Restraint Order form from the Add Note option).
 - The only way the purple should be removed is if a subsequent Therapeutic Restraint Order form exists from the initial/secondary/etc. form within this LOS.
 - Frequency note being past due (**red**) takes precedence over order (**purple**) coloring. Once a Therapeutic Restraints – Nursing Assessment form is added and next visit column updated, coloring can go back to Provider Order needed color.
 - Add a hover option or symbol to hover over when a row is purple so staff will have a visual indicator as to why the color changed.
- As a secondary reminder, once a patient's LOS in **Medical - Therapeutic Restraints** reaches ≥ 8 hours, an Alert should be sent to the Nurses' Queue indicating that a new Provider order is needed/action needs to be taken within Therapeutic Restraints admissions management module.
 - Note, this will need to make sure and look at the timing on when the last order was done and this current length of stay.
- Once a patient's LOS in **Medical - Therapeutic Seclusion** reaches ≥ 12 hours, the row should change to PURPLE, indicating that a new Provider order is needed (i.e. Provider needs to complete a Therapeutic Seclusion Order form from the Add Note option).
 - The only way the purple should be removed is if a subsequent Therapeutic Seclusion Order form exists from the initial/secondary/etc. form within this LOS.
 - Frequency note (**red**) being past due takes precedence over order (**purple**) coloring. Once a Therapeutic Seclusion – Nursing Assessment form is added and next visit column updated, coloring can go back to Provider Order needed color.
 - Add a hover option or symbol to hover over when a row is purple so staff will have a visual indicator as to why the color changed.
- Once a patient's LOS in **Medical - Therapeutic Seclusion** reaches ≥ 12 hours, an Alert should be sent to the Nurses' Queue indicating that a new Provider order is needed/action needs to be taken within Therapeutic Seclusion admissions management module.
 - Note, this will need to make sure and look at the timing on when the last order was done and this current length of stay.
